

**CREATING A
CONNECTED
WORLD**

WHO WE ARE

NTT Communications ICT Solutions (NTT ICT) is a premium global IT provider that delivers solutions for enterprise and government clients who care about the quality of their services. NTT is a long-term thinker, a strategic advisor and, for many companies, a gateway to Asia and the rest of the world.

With over 200 staff on the ground in Australia, we employ the best people in the industry, combining the latest technology with intelligence and creativity to develop IT solutions that will help drive your business.

Our depth and breadth of services separates us from the rest. With over 250 data centres globally and a network presence across 150 countries, underpinned by our own IP backbone and marine cables, we can manage your complete solution providing a single point of contact to reduce complexity. Every day, 80 of the Fortune 100 companies trust our technology to do their work.

We offer you the opportunity to focus on your core business, and the confidence that our solutions work. Our mission is to deliver technology, solutions and services that empower the world's ambitions now and in the future to create a connected world.

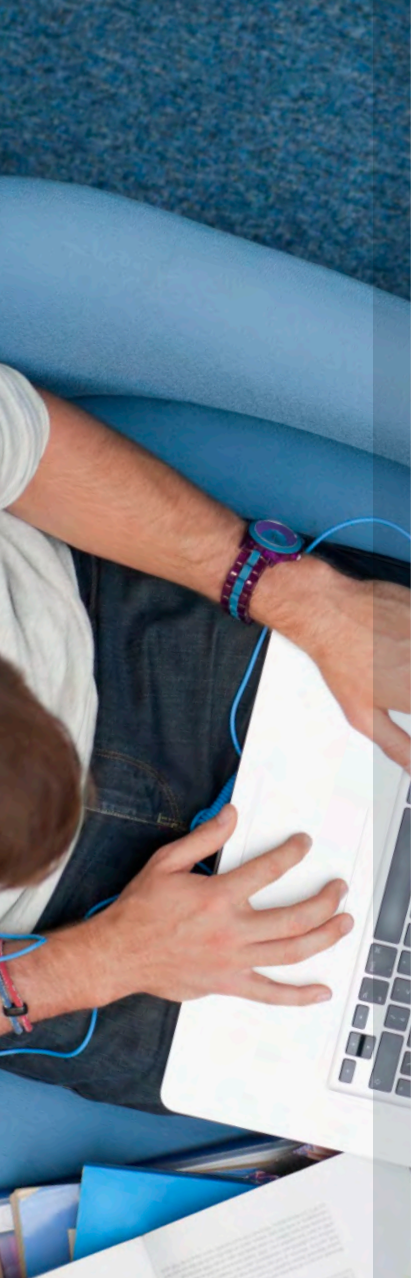

OUR FLEXIBLE SOLUTIONS ARE TRANSFORMING AND ENABLING BUSINESSES OF ALL SIZES TO GROW

OUR SERVICES

There is a lot that enterprises and government need to consider before deploying IT platforms to support their critical work. Will your platform be located onsite or in a data centre? Do you want to use dedicated infrastructure or to contract 'as a service'? How many users will you accommodate and how will your needs change over time?

NTT ICT will work with you to answer all of these questions and more, designing an approach to meet your specific requirements for a reliable, scalable and secure system. Most importantly, your design solution will take advantage of the full range of different services NTT ICT offers, a comprehensive suite of world-class, industry-leading technology and service offerings that allows you to choose the exact service you need.

CLOUD

As a premium global IT provider leading the world in research and development, our commitment to the latest technology and innovation has led us to be market leaders in the provision of Cloud Services to enterprise and government clients around the world.

Take part in the Cloud revolution and leverage virtual, scalable and flexible IT infrastructure that offers a myriad of cost-saving, efficiency and security benefits for any or all of your critical operations.

With NTT ICT, you access a complete solution from a single point of contact and tailored to your requirements. We offer cloud solutions in our data centres or in your data centres. We deliver the private, public or hybrid cloud solutions that work best for your business. We'll find the right match for your requirements from a range of options, oversee implementation and provide unparalleled customer service.

DATA CENTRE

Managing your own data centre space, especially across multiple locations, is a difficult task. Managing power, air-conditioning, security and connections to carriers, while ensuring that you have enough capacity for growth, is challenging.

NTT ICT's data centres have been built to the highest industry standards and are fitted with advanced security and reliability features. They meet Tier III requirements, as classified by the Uptime Institute, and are directly connected to our industry-leading IPv6 compliant, Tier 1, global IP network backbone, with over 250 data centres globally. NTT ICT is your gateway to Asia and the rest of the world.

With NTT ICT, it's easy to do business in our data centres. You can start as small or as large as you like and pay what you use, when you use it. You can access them with ease as they're located close to metropolitan centres, but you can also use our staff, onsite 24x365, at your convenience.

**EMPLOYING THE BEST PEOPLE IN THE INDUSTRY

MANAGED SERVICES

Don't waste valuable in-house resources on day-to-day maintenance tasks.

Leverage NTT ICT's managed service offerings for the management and maintenance of your IT infrastructure. It will save you time and money and allow you to put your focus where it belongs: your core business.

Choose from a suite of managed service offerings from basic smart hands through to monitoring, operating systems or middleware management.

NTT ICT can confidently manage the physical and virtual devices to support nearly any enterprise or web application. This includes servers, virtualisation, storage, networking, security, backup and disaster recovery.

RELY ON
OUR SOLUTIONS

NETWORK

NTT ICT network services reach 160 countries and include extensive coverage in Asia-Pacific. To support the world's rapid increase in Internet traffic, the company is continuously upgrading Arcstar Universal One, its global tier 1 IP backbone, with more bandwidth and more direct connections to major ISPs in many regions. The network boasts the industry's largest dedicated transpacific Internet bandwidth and it's managed under one policy and backed by industry-leading SLAs.

Our network services provide you with unparalleled connectivity, supporting your data, communications and monitoring to optimise your business results. From accelerating the performance of your applications and reducing communication costs to high-quality global leased line and Ethernet leased line services, choose from a range of network solutions to support business requirements.

INFRASTRUCTURE SOLUTIONS

Our customers trust us to design, build, implement and manage their IT infrastructure.

Why? NTT ICT has the highest level of accreditation across a range of technologies. We combine a focus on quality with the experience of delivering successful results. We help customers achieve a successful alignment between business and technology solutions in today's complex commercial and IT environments.

NTT ICT has long-term partnerships with the world's leading IT vendors – HP, Hitachi Data Systems, Oracle, Microsoft, Cisco, Citrix, VMware, Dell, NetApp and Red Hat, to name just a few. Our relationships extend to over 200 vendors. These relationships, combined with our own internal expertise, ensure that NTT ICT minimises the risks associated with ICT while maximising valuable business outcomes. We support clients from the public and private sector, from industries as varied as telecommunications, media, retail, transport, logistics, manufacturing, financial services and professional services.

PROFESSIONAL SERVICES

At whatever stage of your business and in whatever state your architecture, NTT ICT can support you to maintain, improve or overhaul your IT infrastructure. We can provide a cost-effective solution with more expertise and better economy of scale than implementation through your in-house resources.

You'll leverage the best people in the industry combining management skills with intelligence, creativity and the highest levels of IT expertise and knowledge. Our services will allow you to focus on your core business, while we manage your IT projects and rollout.

SECURITY

Diligence is the key word when it comes to security: mitigating risks and ensuring compliance with regulatory mandates and industry standards. Diligence takes focused, day-to-day management. For today's typical IT staff who are fully engaged in meeting core business needs, that's a tall order. NTT ICT can help.

We've made a significant investment in developing a comprehensive and scalable management platform to monitor security threats that incorporates industry best practices and a 24x365 online service portal, backed by a global team of security experts. We offer a global service with multilingual support, close vendor relationships and a worldwide-correlated 365 proactive view of changing threats. This means we speed up the process of mitigating threats and can often fix them before you know they exist.

We do much more than monitor your security infrastructure. With our security specialists, we can help develop your security strategy, undertake risk and vulnerability assessments on your environment, and help deliver end-to-end security architecture. Everything we do is underpinned by ISO 27001 and ITIL, so you have piece of mind in the quality of our services.

OUR SOLUTIONS

IT departments exist to help their organisations achieve their business goals, so they need to be effective, efficient and supported to do their work. But today's complex and changing corporate world poses a host of different problems, challenges, and opportunities.

NTT ICT provides world-class support to IT departments of large enterprise and government. We have developed a range of solutions – reliable and customised to suit your environment – that help our customers achieve their key strategic objectives and optimise their business performance.

**PUTTING QUALITY FIRST
THAT'S WHY OUR
CUSTOMERS TRUST US
TO MANAGE THEIR
MISSION-CRITICAL
IT APPLICATIONS**

REDUCE IT EXPENDITURE

Your business relies more heavily on IT than ever before, but it's necessary to make sure the costs associated with IT are controlled and managed – or with NTT ICT, reduced. You can do this through two key methods: cost optimisation and lowering spend on software licensing. Whether you're tackling cost centres for IT maintenance, expansion, infrastructure, human resources or software, let's work together – you'll be impressed by your savings.

PERFORM WITH THE LATEST TECHNOLOGY

Businesses today cannot afford to be left behind. NTT ICT offers you a range of options and solutions to ensure you're working with the latest technology and are therefore at the top of your game. Whether using data to your advantage, migrating to SaaS, modernising your Solaris or leveraging machine-to-machine solutions, we'll help you perform – better.

ADAPT TO RAPID CHANGE

Whether you need to rapidly deploy new IT infrastructure, move your data centre or get on the cloud – quickly! – NTT ICT is here to support you to adapt to the rapid changes required by your business whether globally and locally. Businesses know that IT is at the core of their activities but sometimes change happens too quickly for your IT infrastructure to keep up. NTT ICT is poised and ready to meet your demands to design, deploy, manage and connect a new IT infrastructure including nearly any web or enterprise application.

FILL IT SKILLS GAPS

It's not always possible nor is it desirable to cover all the skills needed to implement, manage and monitor today's complex IT requirements within your organisation. That's when NTT ICT comes in, providing outsourcing for selective IT services. You get the high-quality skills you need in a cost-effective manner without the burden of recruitment or training.

MEETING SECURITY REQUIREMENTS

The threats to the security of your IT infrastructure are myriad: breaches to your website and web applications, viruses and malware, attacks on your employee's mobile devices such as phones, tablets and laptops. The list goes on. Work with NTT ICT to be safer. We'll meet your security requirements and advise how to prevent problems before they happen.

ENABLE GLOBAL EXPANSION

Whether you're expanding your business in the Asia-Pacific region or globally, NTT ICT has the experience, scope and resources to help you to do it, providing the ICT infrastructure and networks for your enterprise to establish, grow and consolidate. Our knowledge and understanding of local markets through our teams on the ground make NTT ICT the partner of choice for your expansion.
